Environmental Policy

H & M Tracey Construction Pty Ltd confirm that Ecological Sustainable Development is an integral part of our business operations and commit that no business priorities of the company will supersede our requirement to provide development that maintains the environmental balance on which life depends, and that improves the total quality of life, both now and into the future.

We commit to minimise disturbance and negative impacts to the environment as part of our business operations, and to develop and utilise our company policies and procedures to further support this commitment.

Our company understands the principle of “Ecologically Sustainable Development” and confirms ongoing commitment, as an employer and a business, to that principle. Similarly we understand that the actions of an individual can affect the environmental outcomes for everyone, therefore we carefully consider any potential impact of our operations on the environment and ensure our commitment to our community is upheld.

H & M Tracey Construction Pty Ltd expects all employees, contractors and sub-contractors to be responsible and accountable for their own actions; to report environmental issues; and to behave in a manner that reflects the environmentally friendly standards that this Company upholds.

We encourage our employees and other site workers to be active in identifying potential environmental vulnerabilities, and in communicating changes in work practices, the environment or any other variables, to assist us to minimise any negative environmental outcomes.

We commit to safeguard the environment within our community, with our management team and employees being actively involved in the planning and implementation of ecologically sustainable and environmentally acceptable initiatives and procedures to support this commitment.

Our organisation firmly believes that negative environmental outcomes are preventable and that, with the appropriate policies, procedures, training and support in place, our objective of minimising negative impacts to the environment is achievable.

As an organisation, we will continually improve our Environmental Management systems and processes by regularly assessing our business activities, establishing measurable objectives for improvement, remaining aware of current industry best practices and implementing beneficial changes as and when required.
